

# **Open Seminar**

## **Center for Environmental and Health Sciences**

**Date: February 7, 2014 (Friday) 14:00-15:30**

**Venue: Enreiso Conference room #1**

**Presenter: Prof. Adrian Covaci, University of Antwerp**

**Title: Human exposure to organic chemicals in the indoor environment: Focus on flame retardants**

---

Adrian Covaci is a professor of Environmental Toxicology and Chemistry at the Toxicological Centre, Department of Pharmaceutical Sciences, University of Antwerp, Belgium. His research interests focus on the analytical, environmental, biomonitoring aspects and risk assessment of emerging organic contaminants, elucidation of exposure pathways to humans for organic contaminants, estimation of fate, occurrence, and consumption of illicit drugs and pharmaceuticals via wastewater analysis. His lecture will include aspects of environmental measurements, exposure, and potential adverse effects on human health among the general population.

**Organizer**

**Hokkaido University Center for Environmental and Health Sciences**
