

Hokkaido University, Center for Environmental and Health Sciences (CEHS) International Seminar on Environmental Health Sciences

Exposure to Environmental Chemicals and Children's Health: Update on Recent Findings

Date: June 17th (Wed.) , 2015 (9:30-17:00)

Venue: Enyugakusha, Danwa Corner# 1

9:30-9:45	Opening remarks	Prof. Reiko Kishi
9:45-10:15	Introduction of Hokkaido University, CEHS and Hokkaido study	Atsuko Araki (CEHS)
10:15-10:45	Prenatal BPA and MEHP exposure and childhood neurodevelopment	Machiko Minatoya (CEHS)
10:50-11:20	Effect of prenatal organochlorine pesticides (OCPs) exposure on mental and motor development	Keiko Yamazaki (CEHS)
11:20-11:50	Association between maternal exposure to di(2-ethylhexyl) phthalate and reproductive hormone levels in fetal blood	Atsuko Araki (CEHS)
13:00-13:30	Prenatal exposure to PCB & Dioxin on birth weight and allergy and infectious diseases during infancy	Chihiro Miyashita (CEHS)
13:30-14:00	Exposure to house dust phthalates in relation to asthma and allergies in both children and adults	Yu Ait Bamai (CEHS)
14:10-14:40	The Effects of Perfluoroalkyl Acids Exposure in utero on IGF2/H19 DNA Methylation in Cord Blood	Sachiko Kobayashi (CEHS)
14:40-15:10	Prenatal dioxin exposure and infant birth size: gene-environment interaction	Sumitaka Kobayashi (CEHS)
15:20-16:50	Introduction of National Health Research Institutes Introduction of Taiwan Maternal and Infant Cohort Study (TMICS) Main findings of TMICS	Prof. Shu-Li Wang (National Health Research Institutes, Taiwan)
16:50-17:00	Closing remarks	Prof. Reiko Kishi (CEHS)
